## EMPOWERING THE ENTERPRISE TECH TALK 4.0

Sept. 22, 2022 | 4:30-6:30PM | In-Person

## Kubernetes with Cocktails: What's Next in the Container Workload & Micro-services Era?

With so many pursuing a multi-cloud, modern application development strategy, new Kubernetes clusters make efficient application workload production imminently achievable. According to market trends, almost half of IT professionals will increase Kubernetes utilization by more than 50% in the coming year.

Kubernetes is the fastest growing open-source container orchestration platform for automating and scaling the deployment of software applications. As more company workloads move to the Cloud, Kubernetes is positioned to host on premise, hybrid and cloud and is ideal for cloud native hosting.

In short, Kubernetes allows organizations to scale and efficiently operate their production environments without re-architecting infrastructure.

Learn what those successfully using Kubernetes now see for the future of cloud native development and containerization to give your software development environment a competitive edge

Our iDisruptor Series facilitator, John Karabias, Vice President Growth, Strategy & Transformation at Jacobs, and NMTTC Board member, will be sitting down for a fireside chat with our panelists

Join us on September 22, 2022 in partnership with the Maryland Technology Council as we consider new strategies for revolutionizing and empowering your enterprises to new levels of success.

FEE: NMTTC, MTC Members attend FREE. Non-members \$15 Location: Battelle Eastern Science Technology Center 1204 Technology Dr, Aberdeen, MD 21001

The presentation runs from 4:30-5:30 with complementary cocktails and lite-fare after. Share comments with the speakers and network with your peers.
